

THE JUBA MEDICAL COMPLEX (JMC)

Specialist job opportunities at the Juba Medical Complex

The JMC which is a tertiary referral privately funded hospital in Juba, South Sudan, is looking to recruit two ophthalmologists, two orthopaedic Surgeons, two paediatricians and two anaesthetists. This recruitment drive is due to retirements and service expansion. The JMC offers a range of specialist care which includes these specialist areas. It is the only health facility in South Sudan with functioning Computerised Axial Tomographic(CAT) scan and a brand new Magnetic Resonance Imaging (MRI) machine.

The ophthalmology suite is equipped with a modern operating microscope. The operating theatre has the necessary equipment for orthopaedic interventions.

Those interested in either of these positions may take up full time or commit to regular sessional work depending on their circumstances and personal preference. Reasonable accommodation will be made available on site.

To discuss terms please contact the Senior Physician and Hospital Medical Director, Dr Ronald Woro on the email address: ronaldworo@yahoo.co.uk
